BPI Training Testimonial

Nov. 11 2013

Review of training week of Nov 4 - Nov 8.

1. material was presented in as organized and clear ~~as possible~~ a fashion as possible given amount covered.
2. Tom had adequate knowledge of all topics covered.
3. The amount of equipment used, for various tests, requires repetitive hands-on training to master. Given the amount of available time vs. material covered, did not seem like enough time to do this in my opinion. An extra day could be beneficial.
4. Class location and environment were comfortable and appropriate for intense study.
