Shaping Energies, LLC

## Client Testimonial

We requested an energy efficiency audit through Efficiency Vermont and were put in contact with Shaping Energies, LLC. The tests on our 1870's home were completed as scheduled. A report of the findings along with suggested improvements was received within 48 hours of the initial visit. A quote of the costs for the improvements was presented to us. The quote showed potential energy and economic savings. We signed a contract with Shaping Energies to have the agreed upon work performed. The work was done as scheduled efficiently and with little disruption to our daily routine. The final tests showed an air sealing reduction of 36.3%. We look forward to the savings.

We thank the staff of Shaping Energies.
